MEMORANDUM FOR: Director of Data Processing  
THROUGH : Executive Officer  
FROM : [REDACTED]  
Chief, Management Staff, ODP  
SUBJECT : Management Staff Weekly Report for  
Week Ending 17 October 1980

FY 1981 PROCESSING RATES

New rates have been developed for pricing major 1981 processing services -- batch GIMS, and VM. These rates will be used to price the September workload and the results will be compared with the 1980 pricing to determine what, if any, adjustments are necessary to hit the 1981 recovery targets. (U) [REDACTED] 25X1A

NPIC PROCUREMENT

Management Staff reviewed and concurred on an NPIC procurement for a Imlac 1554 automated text editing and composition system. The system is used for editing and/or preparing type for hardcopy reports produced by [REDACTED] components. The system includes eight video display terminals and six minicomputers. Interested ODP personnel can review the ODP file copy by contacting [REDACTED] on X5937. (U) [REDACTED] 25X1A

FIPS PUB 71

Recently, the National Bureau of Standards (NBS) asked Federal agencies to review Federal Information Processing Standard Publication 71 (FIPS PUB 71) that prescribes standards for Advanced Data Communications Control Procedures (ADCCP) to be used by automatic data processing equipment and services employing bit-oriented synchronous data communication links. NBS is establishing an interagency group to review the comments made by the various agencies. Messrs. [REDACTED], OC and George [REDACTED] ODP will represent the CIA at the initial meeting of the interagency group. (C) [REDACTED]

STATINTL  
MEMORANDUM FOR : Director of Data Processing  
FROM : [REDACTED]  
Deputy Chief, Special Projects Staff/ODP  
SUBJECT : Special Projects Staff Weekly Status  
Report for Week Ending 14 October 1980

1. SAFE

STATINTL  
[REDACTED]

STATINTL  
STATINTL  
B. [REDACTED] CSPO representative,  
accompanied by [REDACTED] (Chief/ED/P/ODP), visited  
[REDACTED] SAFE facility in [REDACTED] 6-10 October to discuss  
the SAFE terminal. Six augmentations to the Delta Data  
firmware were agreed upon in the discussions.

STATINTL  
C. Fifteen members of the CSPO travelled to [REDACTED]  
[REDACTED] on 13 October to participate in the Sub-system  
Design Walkthrough Review. The review will be confined to  
the first block of capabilities to be delivered.

STATINTL

2. ADSTAR

STATINTL  
On 10 October, [REDACTED]  
and a DDO representative went to [REDACTED] to  
review the status of the ADSTAR User Workstation (UWS). The  
UWS output has improved, however, we have not yet agreed to  
accept it.

17 October 1980

MEMORANDUM FOR: Director of Data Processing

ATTENTION: Executive Officer

FROM: [REDACTED]  
Deputy Director for Processing

STATINTL

SUBJECT: Processing Weekly Report for Week  
Ending 14 October 1980

1. Systems Availability: Attached is the Systems Availability Report.

2. The CPCAM software now provides special support for the LED 120 Braille Terminal. This capability, in answer to a requirement from the Director of NFAC, permits blind analysts to make more effective use of the VM System. [REDACTED]

STATINTL

3. All GAS processing for quarterly and semi-annual reports have been completed ahead of schedule. [REDACTED]

TINTL

4. Applications has turned over to Production the replacement for the old TRAIN application. Several meetings have been held with Applications to iron out difficulties with processing the PERSIGN interface. Scheduled acceptance date is 31 October. [REDACTED]

STATINTL

5. A meeting was held on Tuesday, 7 October with three recruiters from Ames. Also in attendance were [REDACTED]

NTL

[REDACTED]  
The meeting was held to give the recruiters a first hand look at Data Entry and to give them some idea of the type of people that we need as Data Transcribers. [REDACTED]

STATINTL

6. Additional testing of the [REDACTED] CNS to the 3690 has uncovered several problems which [REDACTED] ED are addressing. [REDACTED] 25X1A

STATINTL

STATINTL

7. A low voltage situation exists at the IBM 3033 Processor in the Ruffing Center. The exact cause of the problem is not known. CEMB, HEB/OL and [REDACTED] are discussing the problem and possible solutions. OL has been aware of the fact that this is a priority problem and the solution must be available within two weeks. A total outage in the Ruffing Center may be required to pinpoint the source of the problem. [REDACTED]

STATINTL

STATINTL

8. Progress on the 1D16 expansion has been slightly delayed due to materials not being on hand in order to relocate the telephone closet. To date, approximately 95% of the demolition has been completed. Electrical work is progressing well and piping for the sprinkler system is on schedule. [REDACTED]

STATINTL

9. SPD has gained three new employees recently. Dick [REDACTED], formerly with OC, and [REDACTED] both joined ISB. Bill [REDACTED] joined OLSB. [REDACTED] left for a two year rotational assignment with OS. All three new employees can be reached on extension 4045. [REDACTED] new number is 4525. [REDACTED]

## SYSTEMS AVAILABILITY SUMMARY

SYSTEM	CURRENT WEEK 06 OCT - 12 OCT	PREVIOUS 90 DAYS 07 JUL - 05 OCT	DIFFERENCE
BATCH	98.26	97.25	+1.01
VM	99.70	97.79	+1.91
GIMEROB	94.84	97.11	-2.27
CAMEROD	98.01	97.41	+0.60
CCITS	96.04	94.07	+1.97
RECON	98.60	94.72	+3.88
TESTAR	100.00	97.16	+2.84
TADS	99.43	95.85	+3.58

GIMEROB HAD 94.84 PERCENT AVAILABILITY FOR THE WEEK WITH A TOTAL OUTAGE TIME OF 2 HOURS 35 MINUTES.

- GIMEROB LOST 2 HOURS 4 MINUTES AS A RESULT OF AN ENGINEERING CHANGE PREVIOUSLY INSTALLED ON THE CONTROLLER ADAPTER UNIT ON SY8A AND B. THE UPGRADE WAS REMOVED AND IS BEING INVESTIGATED BY CDC.
- A HOTSTART OF JES TO RECOVER PRINTER 8 (XEROX 9700) AND 20E TAPE DRIVE FAILED, CAUSING THE SYSTEM TO HANG. SY8 WAS THEN IPL'D HOT WITH PRINTER 8 OFFLINE.

DD/A/ODP WEEKLY REPORT

Week of 8-15 October 1980

I. Major Activities During the Past Week: (U)

A. Support to OTS: (U)

25X1A CENCO ( [REDACTED] conversion) An additional 7500 GIM records  
were added to the CENCO data base on 13 October. The increase of  
space is in preparation for the migration of [REDACTED] STATINTL  
25X1A [REDACTED] data to the CENCO data base for the Office of Technical  
Services. [REDACTED] (S) STATINTL

B. Support to OS: (U)

4C (Community-wide Computer-assisted Compartmentation Control  
System) The project leader briefed the ODP Production planning  
meeting on present requirements and design concepts for 4C. Dis-  
cussions focused on sizing of the 4C computer, and implications  
for the selection process. [REDACTED] (U) STATINTL

C. Support to OSWR: (U)

TADS (Telemetry Analysis and Display System) A new TADS  
baseline was implemented incorporating many new features. Most  
significant was the incorporation of the Virtual Machine Communi-  
cations Facility (VMCF) which allows virtual communications from  
core to core. VMCF should result in a speed-up of many TADS func-  
tions. A test of listing out a TADS point data file [REDACTED] 25X1A  
before and after implementation of VMCF resulted in a four second  
speed-up (13 vs. 17 seconds). [REDACTED] (U) STATINTL

D. Support to OL: (U)

LIMS (Logistics Integrated Management System) The prelimi-  
nary requirements paper for the Agency model property management  
system was completed and is being sent to the Office of Logistics  
LIMS Steering Committee for review. After approval from the  
steering committee, this paper will be sent to all Headquarters  
and key overseas logistics officers for review. [REDACTED] (U) STATINTL
